## PERSONAL PROJECTS

### HTML WebPage (08/2016 – 12/2019)

- This project is a simple WebPage which allows a user to select movies and know details about them.

### Medicus (08/2017 – 12/2017)

- This application is based on Online Searching of Hospitals. A user can search for hospitals nearby.

### Hunt For Life (07/2018 – 11/2018)

- Hunt For Life is basically a game in which the player which in game is used as a third person character tries to reach a next level by either killing or escaping from its enemies. The enemies in the game are shown as zombies who kill for blood and the player has to kill to survive. Different obstacles and clues are initialised and so as to reach a next level. The player has to collect the clues and finally enter a next level. Different levels has different scenes and areas which makes this game looks fabulous.

### Cab Pool (07/2018 – 11/2018)

- An android based management system is designed to handle the entire primary Information required to manage the whole data. Separate database is maintained to handle all the details required for the correct statement calculation and generations. This project intends to introduce more user friendly in the various activities such as record updating, maintenance, and searching. The objective and scope of our project online Cab sharing system is to record the details various activities of user. It will simplify the task and reduce the paper work. To produce an android based system that allow customer to register and pooling online. User can share their source and destination location that helps other user to cab a book in share. By this user can save their money. This project will enhance the awareness among the people for the nearby areas. New residents will be able to understand the nearby areas in a better way.
